STEP 4 – FILL DATABASE DETAILS

The screenshot shows the WordPress installation configuration page in a web browser. The browser's address bar displays the URL `localhost/remarkinfo/wp-admin/setup-config.php?step=1`. The page features the WordPress logo at the top center. Below the logo, a text box contains the instruction: "Below you should enter your database connection details. If you are not sure about these, contact your host." The form includes five input fields with labels and descriptions:

- Database Name:** `remark_db`. Description: "The name of the database you want to use with WordPress."
- Username:** `root`. Description: "Your database username."
- Password:** `password`. Description: "Your database password." A "Show" button is visible next to the input field.
- Database Host:** `localhost`. Description: "You should be able to get this info from your web host, if localhost does not work."
- Table Prefix:** `wp_`. Description: "If you want to run multiple WordPress installations in a single database, change this."

A "Submit" button is located at the bottom left of the form.
